File No.: 82-4164

**Franc-Or Resources Corporation** 

Consolidated Interim Financial Statements

Nine-month period ended September 30, 2005

### Message from the president

Third Quarter 2005

Franc-Or continues to experience a delay in the development of the Bugdainskoe project in southeast Siberia, Russia. As announced on August 17, 2005, the sixty-day extension to the Memorandum of Agreement signed December 9, 2004 with Priargunskaya Industrial Mining-Chemical Corporation (PPGKHO) was exceeded on August 9, 2005. Since then, the Corporation has continued to work with PPGKHO to resolve certain outstanding legal and corporate issues relating to the Bugdainskoe property. The Corporation has asked PPGKHO to resolve these issues in the quickest manner possible. PPGKHO continues with its decision not to extend the MOA, as it reports that the outstanding issues may be resolved in the near future. The Corporation is doing everything it can to cooperate and work with PPGKHO, but it realizes that there is no guarantee when, or if, a positive resolution will be achieved.

The Corporation continues to conduct limited technical work on Bugdainskoe in preparation for an exploration drill program, but will not commence any major expenditures until PPGKHO is able to resolve the above-noted issues. Management remains hopeful that this can be accomplished soon and that a Definitive Agreement can be signed, and advanced exploration drilling and development of the Bugdainskoe project can proceed.

Owing to the uncertainty of our Russian program, the Corporation has been actively seeking and evaluating potential acquisition properties in Peru and Mexico, as well as in Nevada, Arizona, and Utah in the United States. Also in Nevada, the Corporation has paid the annual BLM and county fees for its two hundred mineral lode claims at Humboldt Springs, while continuing to search for a potential joint-venture partner to share the cost of a follow-up drilling program.

The price of gold per ounce averaged approximately US \$446 during the third quarter, reaching a trading high of slightly above US \$474 on the last day of September. Since the end of the third quarter we have seen more price volatility. A near 18-year trading high of slightly over US \$480 was reached in the first half of October and, on November 4<sup>th</sup>, gold hit a low of US \$455, owing to a rebound in the valuation of the US dollar. Some analysts suggest that we may be in a multi-year boom cycle for gold prices, with an elevated average of perhaps US \$450 per ounce over the next five to ten years. In the short term, several analysts predict the price to exceed US \$500 in the first half of 2006 due to inflationary pressures stemming from higher oil prices, uncertain costs of the Iraq war, and the effects of the unforeseen costs of severe weather in the U.S. and elsewhere. This effect is more pronounced when coupled with an increase in worldwide gold consumption (mostly from China) and a decrease in worldwide gold production.

We agree that gold will be in an elevated cycle, with some volatility, for an extended period. We also anticipate that silver and zinc (and other select metals) will maintain higher average prices over extended periods, and we are working hard to ensure that at least one property acquisition, whether in Russia or elsewhere, will allow us to take advantage of these anticipated price increases.

## **Management Discussion and Analysis**

The following management discussion and analysis (the "MD&A") of the financial condition and results of the operations of Franc-Or Resources Corporation ("Franc-Or" or "the Company") constitutes management's review of the factors that affected the Company's financial and operating performance for the nine-month period ended September 30, 2005. This MD&A should be read in conjunction with the Company's financial statements and related notes for the third quarter ended September 30, 2005, along with the Company's MD&A included in the 2004 annual report.

Further information regarding the Company and its operations are filed electronically on the System for Electronic Document Analysis and Retrieval (SEDAR) in Canada and can be obtained from www.sedar.com.

#### Overview

Franc-Or is a public company listed on the TSX Exchange. The Corporation is a mining company engaged in gold mining, development, and exploration.

### **Operating Activities**

### Revenues

The Corporation earned interest income of \$47,303 for the first nine month of 2005 (\$56,617 in 2004). The decrease in interest income is due to the lower level of short-term investments of \$759,130 on September 30, 2005 as compared to \$1,579,229 on September 30, 2004. In addition, \$58,180 of bad debt was recovered in the first quarter of 2005 relating to certain royalty arrears from French Guiana operations. Finally the Corporation sold in the first quarter of 2005, a bulldozer located in French Guiana for an amount of \$12,960 that had been previously written-off.

### Expenses

General exploration expenses of \$285,002 are made up mainly of geological and legal fees to conduct due diligence on the Bugdainskoe property (Details are outlined in Note 4 to the consolidated financial statements). In 2004, the Corporation was aggressively evaluating several properties in various stages of exploration that required, in addition to geological and legal fees, travelling to various properties in Russia. The total amount allocated to general exploration was \$379,895 in the first nine months of 2004. This relative decrease in activities is reflected as well in the professional and consulting fees of \$113,421 for this period, as compared to the 2004 figure of \$141,958.

The administrative and shareholders' information expenses of \$98,373 in the first nine months of 2005 were slightly lower than the 2004 figures of \$104,336.

In summary, the net loss amounted to \$420,615 for the first nine months of 2005 as compared to \$569,572 in 2004.

### **Working Capital**

Working capital as at September 30, 2005 that totals \$1.4 million (\$1.6 million on December 31, 2004), coupled with Newmont's proposed investments, with no long-term debt, will enable the Corporation to fulfill its current commitment on the Bugdainskoe property for a minimum of one year beyond the signing of the Definitive Agreement.

The Corporation relies upon successful financing programs to fund future exploration and development on its properties. Future liquidity will depend on the Corporation's ability to arrange debt or equity financing. The Corporation will have to raise additional funds to complete the acquisition, exploration, and development of its properties. While the Corporation has been successful in raising funds in the past, there is no assurance that it will continue to do so in the future.

### **Investing Activities**

The Company's activities during this quarter were consistent with its business plans and exploration work objectives. The focus was driven toward performing the technical and legal due diligence work on the Bugdainskoe property in Russia.

### **Financing Activities**

In July 2004, Franc-Or closed a \$4 million Subscription Receipts agreement with Newmont Mining Corporation ("Newmont") convertible into shares and warrants of the Corporation when Franc-Or acquires the right to earn at least a 60% interest in a strategic gold exploration property located in Russia that is satisfactory to Newmont. The proceeds of the Subscription Receipts will be used to fund the Corporation's gold exploration and development initiatives in Russia. If no such property is acquired by May 18, 2006, whatever remaining Subscription Receipts proceeds that exist at the time will be returned to Newmont.

In December 2004, Franc-Or signed a Memorandum of Agreement on the Bugdainskoe property located in the southeast corner of Chita Region of southern Siberia. Franc-Or and Newmont have been conducting a technical and legal due diligence on this property. If the due diligence is satisfactory to Newmont, the Subscription Receipts will be converted into Franc-Or common shares and warrants, and the purchase proceeds will be released to Franc-Or.

On June 10, 2005, Newmont Mining Corporation of Canada Limited ('Newmont') completed the exercise of 2,067,900 of its previously purchased Subscription Receipts at Cdn \$0.16 per Subscription Receipt for aggregate proceeds of Cdn \$330,864 such that Newmont holds 2,067,900 common shares of Franc-Or, 1,033,950 warrants and the remaining 22,932,100 Subscription Receipts.

Additional details are outlined in Note 3 to the consolidated financial statements.

Notes to Consolidated Interim Financial Statements September 30, 2005 (unaudited)

### 1. Summary of significant accounting policies

### Basis of presentation

The consolidated financial statements of the Corporation have been prepared by management in accordance with generally accepted accounting principles in Canada for interim financial statements. The interim consolidated financial statements have, in management's opinion, been properly prepared using judgment within reasonable limits of materiality. These interim consolidated financial statements do not include all the note disclosures required for annual financial statements and therefore they should be read in conjunction with the Corporation's audited consolidated financial statements for the year ended December 31, 2004. The significant accounting policies follow that of the most recently reported audited annual consolidated financial statements.

### **Accounting estimates**

The preparation of interim financial statements in accordance with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from management's best estimates as additional information becomes available in the future.

### 3. Share capital (Cont'd)

### Subscription receipt

On June 10, 2005, Newmont Mining Corporation of Canada Limited ('Newmont') has completed the exercise of 2,067,900 of its previously purchased Subscription Receipts at Cdn \$0.16 per Subscription Receipt for aggregate proceeds of Cdn \$330,864 such that Newmont holds 2,067,900 common shares of Franc-Or, 1,033,950 Warrants and the remaining 22,932,100 Subscription Receipts.

Each Subscription Receipt represents the right to receive one Unit composed of one common share and a one-half common share purchase warrant. Each whole common share purchase warrant entitles the holder to acquire one common share until July 7, 2007 at an exercise price of Cdn \$0.25.

The extension of the expiry date of the warrants underlying the Subscription Receipts by one year to July 7, 2007, at the same exercise price of Cdn \$0.25 per one common share, has received regulatory and shareholders approval.

The remaining 22,932,100 Subscription Receipts are automatically exercised into the underlying Units when Franc-Or acquires the right to earn at least a 60% interest in at least one strategic gold exploration property located in Russia that is satisfactory to Newmont. If no such property interest is acquired by May 18, 2006, the remaining private placement proceeds of approximately Cdn \$3,670,000 will be returned to Newmont whereupon the Subscription Receipts will be cancelled for no further consideration.
